# Meet our Team

## BHARAT NARINE **Director: QMS**

---

Bharat is an ISO 9000 Quality Management System professional with over 22 years of proven success in Implementation and Training of ISO 9000 for companies across diverse industries, including O&G, Petrochemical, Logistics and Manufacturing. Mr. Narine has also served as Administrative Manager, Business Development Manager, Management Representative, also Purchasing and Materials Manager for the O&G Industry in Organizations such as Champion Technologies Inc. Precision Drilling Inc. at various international posting such as Colombia, Ecuador, Texas, and Venezuela. He is Fluent in English and Spanish and currently resides in Guyana

Born in Guyana and migrated to Venezuela at the age of 18, Bharat has worked in the Petrochemical and Drilling sectors of the O&G Industry for 12 yrs. from 1994 to 2006. He has graduated at the Clearlake University, Houston, Texas in 1997 in the area of ISO 9000 and Internal Auditing for Quality Management Systems.

As the Quality System Director he is responsible for the development and implementation of ISO 9000 Quality Management Systems and Training both internally and externally, as well as the procurement for manpower, products and services that complies with the ISO Requirements.

## Dorwin Kingston

**Business Intelligence and Stakeholder Engagement  
Director /ISO Liaison**

---

Mr. Kingston functions as the director of Business intelligence for GOP. He oversees high level strategic and tactical decisions for the business and it's tools and processes. He is also our Stakeholder Engagement director, ensuring that the relationship between GOP and its partners are maintained. He has years of leadership experience in business operations and Quality management (ISO) and is a certified internal auditor by the Guyana National Bureau of Standards. As a result, he's able to effectively build and maintain business/management processes for various backgrounds in accordance with ISO standards. He has functioned as an internal auditor for various companies and was involved in the building of different Quality Management Systems.

# What is ISO 9001

- ISO 9001 is a standard that sets out the requirements for a quality management system. It helps businesses and organizations to be more efficient and improve customer satisfaction.
- A new version of the standard, ISO 9001:2015, has just been launched, replacing the previous version (ISO 9001:2008).

# What Is A Quality Management System

- A quality management system is a way of defining how an organization can meet the requirements of its customers and other stakeholders affected by its work.
- ISO 9001 is based on the idea of continual improvement.
- It doesn't specify what the objectives relating to "quality" or "meeting customer needs" should be, but requires organizations to define these objectives themselves and continually improve their processes in order to meet them.

# Benefits To My Organization

- Work in a **more efficient way** as all your processes will be aligned and understood by everyone in the business or organization. This increases productivity and efficiency, bringing internal costs down.
- Meet the necessary **statutory and regulatory requirements**.
- **Expand into new markets**, as some sectors and clients require ISO 9001 before doing business.
- **Identify and address the risks** associated with your organization

# ISO 9001: benefits

- Work in a **more efficient way** as all your processes will be aligned and understood by everyone in the business or organization. This increases productivity and efficiency, bringing internal costs down.
- Meet the necessary **statutory and regulatory requirements**.
- **Expand into new markets**, as some sectors and clients require ISO 9001 before doing business.
- **Identify and address the risks** associated with your organization

# Should I be certified to ISO 9001

- Certification - when an independent certification body audits your practices against the requirements of the standard – is not a requirement of ISO 9001, but is a way of showing stakeholders that you have **implemented the standard properly**.
- For some companies, third- party certification may be a requirement. For example, some governments or public bodies may only contract suppliers that have been certified to ISO 9001.
- ISO does not perform certification. For more information about the certification process, see [www.iso.org](http://www.iso.org) and the publication *ISO 9001:2015 – How to use it*.

# Examples of success with ISO 9001

- ISO 9001 is used successfully all over the world. In 2013 alone, over **one million certificates** to the standard were issued across 187 countries, and many other companies and organizations have used the standard without seeking certification.
- Success with ISO 9001 can take many forms. For some enterprises, it is all about attracting new clients, while others see it as the blueprint for internal efficiency.

# GOP TECHNICAL SERVICES

## 1. GAP ANALYSIS

## 2. DOCUMENTATION PREPARATION

- 2.1 Quality Manual
- 2.2 Standard Operating Procedures
- 2.3 Work Instructions
- 2.4 Quality Records: Forms, Graphs, Charts etc.

## 3. QMS IMPLEMENTATION

## 4. TRAINING

- 4.1 ISO 9001 Awareness Training
- 4.2 ISO 9001:2015 Requirements
- 4.3 Internal Auditing for ISO:9000

## 5. Quality Management System Audit

# Training Coverage

GOP will be providing the following training services to assist in your organizations journey to becoming ISO certified;

- ISO:9001 - 2015 Awareness Training

This session will commence after the gap analysis is completed and will run for two days. It is aimed at ensuring all employees are familiar with how ISO:9001 works, granting them the ability to operate in an ISO environment.

- ISO:9001 - 2015 Standards Requirements Training / 2nd Month

The ISO standards are what governs the creation of the quality manual. Training will be done on the ISO:9001 2015 standards to help guide your organization to establish the QMS.

# Training Coverage

- Internal Auditing for ISO:9000.

After the QMS has been established, an internal audit must be done to ensure the organizations compliance to the standards. Your employees will be trained on how to skillfully plan and execute internal audits to guarantee the organization's readiness for external evaluation and certification.

- Risk Management

Your key employees will be trained on how to properly identify and manage the different risks to the organization. This ensures the organization is aware of its risks and proactively mitigates potential risks.
